

## Resultat de segementation Otus

Note : Dans ce premier test, on considère les bandes sont vrais bandes (true positive) quand la distance (la difference) entre les bandes détectées et les bandes données est inférieur à 15 ou 10.

		Bande estimée	
		positive	negative
Bande réelle	positive	TP (matchBandes)	FN (Bande oubliée)
	negative	FP (Bande ajout2e)	TN

Attention : on met la valeur de TN à 0 , où est les vrais non-Bandes et elle est nombreuse en réel.

Accuracy =  $TP / (TP + TN + FP)$

1 . Etude avec Gerard/P/ 02-10-2015 1\_A0\_1389-1486x198-834.
